

ARC ON TIME MEASURING INSTRUMENT

SALIENT FEATURES

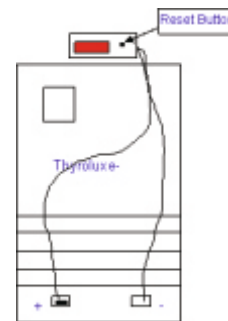

- Easy to install, can be mounted inside or outside the machine depending on users choice.
- It shows present arc on time from the instant of reset as well as total cumulative time from the installation of instrument.
- Password protection for resetting the arc on time measured..
- No external power supply is required. Works on welding output voltage.
- Memory facility is available to store the arc on time counts.
- User friendly password setup as well as password reset facility.
- Maximum count is 999 hrs 99 min. and 59 Sec. from the instant of reset and cumulative can be 99999 hrs 99 min.

BRIEF SPECIFICATIONS:

| SR. NO. | PARAMETERS | SPECIFICATIONS |
|---------|---|--|
| 1 | Input Supply | 100-30V DC Directly Works on Welding output Voltage |
| 2 | Maximum ARC On Time Measurement from the instant of Reset | 999 Hours 99 minutes and 59 sec |
| 3 | Maximum Cumulative Time measurement from the time of Installation | 99999 Hours 99 minutes |
| 4 | Dimensions in mms (LxWxH) | 130 x 165x 80 |
| 5 | Weight (kg.) | 1.0 |
